

Curriculum Vitae

Personal Details

Name	SOWMYA SHETTY
Title	Associate Software engineer
Year of birth	12/05/2002
Residence	Bangalore, Karnataka
Nationality	Indian

Profile

A software engineer with 11 months of experience with good understanding of BT 5.2 + EDR and also have good knowledge in Linux kernel. Seeking for a challenging and responsible position in an esteemed organization, which would be rewarding in terms of good learning experience and contribute to organizational and personal growth.

Career

Currently I am working as Associate Capgemini Engineering (Global Edge Software part of Capgemini Engineering).

Competences

- Operating System: Windows, Linux
- Language: C programming
- Testing Software: ComProbe Bluetooth Protocol analyzer.
- BT Profile: HFP 1.8, A2DP 1.4, Mesh.

Training

Training Attended	Domain Training
Duration	☐ 2 Months
Topics	- Engaged in getting trained in Bluetooth core concepts from the SIG specification (Core Spec v5.2) - Engaged in performing Bluetooth classic profile validation and analysis of air logs (COMPROBE) - BR/EDR work experience (core protocol version, classic profile (HFP, A2DP))

Training Attended	Networking Training
Duration	☐ 1 months
Topics	Networking (Tcp/Ip protocols, OSI Model)
Training Attended	System c with Linux programming
Duration	☐ 2 Months
Topics	- C language - Data structure - Linux operating System

Project	Development of LE profiles, Mesh profile
Duration	5 month and present
Topic	Custom profile ▪ Registration of the custom services, characteristics based on requirements. ▪ Validation and Testing of implemented service and characteristics. ▪ Language: C programming ▪ Tools and IDE: nRFConnect App, Seggar Jlink Tools, Microsoft visual studio code. BAS profile ▪ Registration of the Battery services, characteristics based on requirements. ▪ Validation and Testing of implemented service and characteristics. ▪ Language: C programming ▪ Tools and IDE: nRFConnect App, Seggar Jlink Tools, Microsoft visual studio code. Testing nrf52840 board with smartphone Heart Rate profile ▪ Developed and implemented a Heart Rate Profile for BLE using the NRF52840 board, serving as the central role. ▪ Implemented various central role functions, dynamically responding to user inputs to establish BLE connections, conduct service discovery, perform real-time scanning, and enable data exchange on the NRF52840 board. ▪ Validation and Testing of implemented functions ▪ Language: C programming ▪ Tools and IDE: nRFConnect App, Seggar Jlink Tools, Microsoft visual studio code.

	Mesh Stack ▪ Developed and Implemented the Mesh Profiles GATT bearer, Provisioning through GATT bearer. ▪ Implemented provisionee Part ▪ Implemented the relay feature ▪ Validation and Testing of implemented functions ▪ Language: C programming ▪ Tools and IDE: Linux
